It adopts international advanced design concept, and it's famous for outstanding performance with

biomechanics and ergonomics, which also conforms to human anatomy and athletic physiology.

Square tube 50\*110mm and round tube  $\Phi$ 60mm get combination making the product stable and

elegant.

The cushion adopts one-time forming technology making it comfortable and durable. The seat

adjustment is equipped with pneumatic system and aluminum alloy rail for sliding.

The cushion leather gets sewed with double stitches looking luxurious.

Full enclosed weight cover adopts absolute security design concept. where shown the beauty

appearance and real high-end quality.

The gradually slowing action mode can energize most of the pectoralis major muscle, while minimizing the involvement of the anterior deltoid..

The coupled motion arms make the strength training more balanced, and the elbow pad transmits the power to the specific muscle directly.

Minimize the outward rotation of the arms, thereby reducing the pressure on the shoulder joint.

The seat can be adjusted to the user's desired range of motion when used.

Specifications

DIM: (L)1492\*(W)1235\*(H)1655mm

N. W. : 235KG

Weight stack:

Standard: 80KG

Max: 150KG

Muscles trained: chest, mainly Pectoralis major muscle
